Dear BICOM Therapists,

The BICOM Combined Test Technique (CTT) is a proven system for a precise and quick detection of strains.

Over an extended period of time, we have collected suggestions from users on how to further optimize the existing test kits. Doctor Sabine Rauch, in cooperation with doctor Wolfgang Rohrer and Mr. Jörg Fiedler, has extensively tested the test kits and initiated various modifications.

At this point we would like to thank you cordially for your great commitment.

From now on, we are pleased to offer you an extended and, in many details, improved assortment and an additional test kit.

As the owner of CTT test kits, you have the option of upgrading your individual test kits to the latest standards with extension kits. Further information can be found in this brochure.

With the first CTT order you place, a free copy of the revised edition of the CTT handbook will be included.

I wish you much pleasure and a large number of therapeutic successes using bioresonance and in particular the BICOM CTT.

## CHANGES TO THE PREVIOUS VERSION:

- **The following ampules have been removed:**
  - Basic Ampule Aliments
  - Lectin
  - Pulse / Phasine
- **The following ampules are new:**
  - Soy
  - Salicylic Acid
  - Yeast
  - Histamine
- **The following ampules were consolidated:**
  - "Gliadin" and "Gluten" to "Gluten/Gliadin"
- **The following ampules have been renamed:**
  - "Lactose Intolerance" to "Lactose"

*An EXTENSION KIT\* with the following ampules is available to upgrade your existing test kit:*

- Soy
- Salicylic Acid
- Yeast
- Histamine
- Gluten/Gliadin
- Lactose

\* This extension kit can be purchased by all owners of the test kit "Allergic Strains" who purchased their test kit before 1 November 2017.

## CHANGES TO THE PREVIOUS VERSION:

- The following ampules have been removed:
  - Melanoma
  - Lymphogranulomatosis
- The following ampules are new:
  - Pigmented nevus (takes the place of "Melanoma")
  - Lymphadenopathy (takes the place of Lymphogranulomatosis")

*An EXTENSION KIT\* with the following ampules is available to upgrade your existing test kit:*

- Pigmented nevus
- Lymphadenopathy

\* This extension kit can be purchased by all owners of the test kit "Degenerated Cells I" who purchased their test kit before 1 November 2017.
